RE: RoHS Restriction of Hazardous Substances (RoHS) Statement of Compliance

To Our Valued Customer:

RoHS stands for the “restriction on the use of certain hazardous substances in electrical and electronic equipment”. This European Directive aims to control the use of these Hazardous substances.

RoHS is often referred to as the "lead-free directive", but it restricts the use of the following ten substances:

- Pb - Lead (<0.1%)
- Hg - Mercury (<0.1%)
- Cd - Cadmium (<0.01%)
- Cr⁶⁺ - Hexavalent Chromium (< 0.1%)
- PBB – Polybrominated Biphenyl (<0.1%)
- PBDE – Polybrominated Diphenyl ether (<0.1%)
- DEHP – Bis(2-ethylhexyl) phthalate (< 0.1%)
- BBP – Butyl benzyl phthalate (< 0.1%)
- DBP – Dibutyl phthalate (< 0.1%)
- DIBP – Di isobutyl phthalate (< 0.1%)

RoHS Regulations require that product must not contain the hazardous substances above the maximum concentration values.

Amstek Metal LLC is a multi-location and does not melt materials sold to our customers. Amstek Metal LLC does not knowingly add or expose these materials to any of the hazardous substances listed within the EU RoHS Directive. As cited in statements from our suppliers, the materials sold by Amstek Metal LLC do not exceed the allowed levels of these substances, and therefore, the materials are compliant with the EU RoHS directive.

If you have further questions, please do not hesitate to contact us.

Best regards,

Sherrie DeLong
