

April 1, 2009

To Our Valued Customers:

RoHS stands for the "restriction on the use of certain hazardous substances in electrical and electronic equipment". This European Directive aims to control the use of the following hazardous substances:

- Lead
- Cadmium
- Hexavalent Chromium
- PBB – polybrominated biphenyl
- PBDE – polybrominated diphenyl ether
- Mercury

RoHS Regulations require that product must not contain the hazardous substances above the maximum concentration values.

Amstek Metal requires our Suppliers to certify that all of their materials conform to this requirement.

Sincerely yours,

A handwritten signature in cursive script that reads "Clara Bal".
